

ITEC-4G5000

4G Wireless Access Intercom System

Modern Wireless Access Control & Visitor Communication

Main Features

- 4G Wireless Communication
- Remote Configuration via SMS
- Stainless Steel Housing
- Full Metal Keypad
- Noise Cancelling Audio
- Password & RFID Access
- Flush Mounted Design

Reliable 4G Wireless Visitor Intercom

Unlike traditional wired intercom systems, ITEC-4G5000 utilizes 4G wireless communication, eliminating complex cabling while providing reliable visitor communication and access control.

Visitors can call residents or security personnel through the intercom. The receiver answers the call using any mobile or landline phone, communicates with the visitor, and remotely unlocks the entrance when authorized.

Designed for residential, commercial and industrial entrances, it provides a simple, secure and cost-effective access control solution.

Key Advantages

4G Wireless Communication

No cable between entrance and indoor units

Remote Management

Configuration via SMS.
Remote monitoring.
Auto-dial numbers.

Excellent Audio

Noise cancelling microphone
2W speaker
90dB ringing volume

Suitable for

- Apartment
- Residential Estate
- Industrial Facility
